

## What Our Customers Say:

"Elena has been consistently taking the Recell Gold, and there's been a huge improvement in her skin! Her blemishes on her face are fading away, even her legs and hands are in better condition. Elena is happy about the results she is seeing, & it's nice to see her smile when she looks in the mirror at her reflection!"

"In 2017 I was diagnosed with stage 4 Prostate Cancer, but believe it or not my major concern was my knees. It became too painful to turn over in bed. The pain changed my walk. I have known fear but not dread. Activity is life. I met Dr. Hill in October 2019, she put me on ReCell and adjusted my diet. Within a week I felt a difference, my knees started to feel better!! Now it is going on 3 months later my walk is back, knees are getting stronger and prostate cancer is in remission. I will always be taking ReCell!"

"Just noticed the swelling in my right knee is gone. That knee has been swollen forever! The trauma goes back to highschool foot ball. I thought I was going to have surgery . It had swollen twice its size! The knee has been through a lot over the years I thought it would never go down. Thanks again, Dr. Hill!"

# Re-Cell

The stuff that  
hair & skin are  
made of!

## WHY IS RE-CELL COMMONLY REFERRED TO AS "A MIRACLE IN A BOTTLE"?

ReCell is not a drug or medicine, it is a carefully crafted nutritional complex which supports the body's healing processes at the cellular level.

ReCell contains the following organic essential fatty-acids: sunflower seed oil, flax seed oil, sesame seed oil, olive oil, coconut oil, evening primrose oil, rice and oat bran oil, sunflower lecithin and tocopherols. EFA's are necessary for the following bodily functions:

1. To prevent cellular break-in by hit and hide antigens and cancer cells.
2. To form healthy cell membranes.
3. For the proper development and functionality of the brain and nervous system.
4. Thyroid balance and hormone production.
5. To prevent adrenal fatigue.
6. To regulate inflammatory responses as well as, liver and immune functions.

## ABOUT RE-CELL

7. Omega-9 fatty acids have been shown to increase HDL ("good") cholesterol and decrease LDL ("bad") cholesterol, they help eliminate plaque build-up in the arteries, which causes heart attack, stroke caused by plaques and tangles on the brain.

8. Omega-6 FAs encourage blood clot formation, while Omega-3 oil reduces clotting. The perfect balance to regulate proper clotting of the blood.

9. Promotes beautiful skin and hair. Essential Fatty Acids are the main structural component for the body's trillions of cells, and is critical for proper cellular growth and division.

In other words they support repair and/or healing at the cellular level. they support repair and/or healing at the cellular level.

ReCell contains Aloe Mucopolysaccharides.

Mucopolysaccharides are very effective intracellular (inside the cell) antioxidants and free radical scavengers.

Vitamins and minerals can only function outside the cells.

The large Mucopolysaccharide molecules are immune modulating, which has been shown to have a powerful healing effect on AIDS, cancer, Fibromyalgia and many different immune system disorders.

It is also this large molecule that causes the body to produce a natural chemical, "tumor necrosis factor" that functions to shut off the blood supply to tumors.

ReCell contains oleocanthal. Studies suggest that oleocanthal can reduce the accumulation of  $\beta$ -amyloid proteins crucially involved in Alzheimer's diseases.

Amyloid plaques is the main component Breakthrough in the brains of people with Alzheimer's.

Oleocanthal has also been shown to inhibit the growth of several breast cancer cell lines. Oleocanthal treatment caused a marked down regulation (phosphorylated mTOR) in metastatic breast cancer.

These results strongly indicate that mTor inhibition is at least one of the factors of the reported anticancer and neuroprotective properties of oleocanthal.

These results strongly indicate that mTor inhibition is at least one of the factors of the reported anticancer and neuroprotective properties of oleocanthal.

These results suggested that fatty acids with 5 $\alpha$ phareductase inhibitory activity block the conversion of testosterone to 5 $\alpha$ phadihydrotestosterone (DHT) and then inhibit the proliferation of prostate cancer cells.

Since dht causes male pattern baldness, alopecia and skin wrinkles ReCell is also used topically.
